Erratum

Thomaseth K, Salvan A. Estimation of occupational exposure to 2,3,7,8-tetrachlorodibenzo-*p*-dioxin using a minimal physiologic toxicokinetic model. Environ Health Perspect 106(Suppl 2):743–753 (1998).

Equation 9: The limits of integration in the last integral in the equation, which read as t_0 and $t-s$, should be replaced by s and t , respectively.

Table 4: The acronym NCME should read NLME.

Table 5, footnote *a*, should read: Linear model $ladj(t,p_i|k_f) = ladj(t_0)y_1(t,p_i|k_f) + exposure y_3(t,p_i|k_f)$, ($ladj(t_0) = 7ppt$)

Table 6, footnote *a*, should read: Linear model $ladj(t,p_i|k_f) = ladj(t_0)y_1(t,p_i|k_f) + input y_2(t,p_i|k_f) + exposure y_3(t,p_i|k_f)$, ($ladj(t_0) = 7ppt$)
